

COOPERATIVE ECONOMIC INSECT SURVEY REPORT  
Glenn A. Salsbury, Survey Entomologist

Report 9, Volume 57  
July 15, 2009

GARDEN WEBWORM: Twenty-six moths were trapped on 14 July.

YELLOWSTRIPED ARMYWORM: Twenty-five moths were trapped on 14 July.

EASTERN ASH BARK BEETLE: Adults are now active. The eastern fivespined ips is the next most common bark beetle being caught.

REDHEADED ASH BORER: Adults are still commonly showing up in trap catches.

RED OAK BORER: From one to five adults are being caught nightly in light traps. Most adults emerge in odd numbered years.

The above observations were made in the Pittsburg area in Southeast Kansas.
